Main field of curatorial activities:

Art & moving images

Curating means for the Cologne based media artist Agricola de Cologne an artistic act and is representing therefore his individual artistic expression. While he started curating already in the 80ies of 20th century, curating became an artistic expression only in 2000, when he decided to focus his artistic work exclusively on the use of new media. In 2000, as well, he founded "JavaMuseum – Forum for Internet Technology in Contemporary Art, a virtual museum for virtual art, and curated for the first time virtual space. When he was invited to prepare in 2004 for the Biennale of Electronic Art Perth/Australia a global networking project on the topics "Remembering-Repressing-Forgetting", it represented the key work for focussing on curating as an artistic expression by dealing with digital media, particularly the Internet as a space and medium of art. In 2005, he founded CologneOFF – Cologne International Videoart Festival – a unique festival project at that time to be realised in a global network in collaboration with cooperation partners worldwide. In 2014, CologneOFF celebrated its 10th festival edition.

Agricola de Cologne's main interest in "art with moving images" is manifesting itself also in a huge collection of thousands of art films and videos on the topic "memory & identity", including CTF – Collective Trauma Film Collection, which again is representing the basis of „A Virtual Memorial – Commemorative Interventions", but also in creating and developing new event formats, in order to bring "art & moving images" closer to the audience, like "artvideoKOELN – audiovisual experiences 2015.

that's the name of a series of events around the topic of „audiovisual art“, developed by the Cologne based media artist and curator, Wilfried Agricola de Cologne. The 1st edition will be realised in collaboration with TENRI – German Cultural Centre located at the old Southern part of the city of Cologne.

Launched in 2005 by Agricola de Cologne, as a curatorial initiative artvideoKOELN was during the past 10 years the driving power behind *CologneOFF* – Cologne International Videoart Festival – an unique festival project of its kind exporting media art from Cologne in collaboration with networking partners all over the world.

The event on 16 May 2015 will present on the different spatial levels at TENRI a selection of art videos and film by more than 410 international artists from 61 countries following an open call for submitting audiovisual works.

Selected by the jury consisting of Kai-Welf Hoyme (Cologne) - Yoshiro Shimizu (Cologne) - Wilfried Agricola de Cologne (Cologne), the videos will be presented in different formats – screening, projection and installation, including also programs of CologneOFF's international partners Now & After International Videoart Festival Moscow (Russia), VideoBabel – International Festival of Audiovisual Art Cusco (Peru) & Athens Digital Arts Festival (Greece), as well as as an introduction by Wilfried Agricola de Cologne and an artists talk including invited Cologne based video creators, moderated by Wilfried Agricola de Cologne.

CologneOFF XP nomadic - videoart in a global context – Searching for an ideal form of presenting “art & moving images”

As a dynamic media art event context and nomadic festival project designed, programmed, curated and directed by Agricola de Cologne in the framework of Cologne International Videoart Festival, “CologneOFF 20XX – videoart in a global context” started in 2010, when he took the perception how the jury for his 6th festival edition (directors of 7 renown international festivals) was voting - just one video collected 4 votes showing the curators following strictly their individual curatorial point of view - as the basis for researching an (his) ideal form of (re)presenting videoart.

The result is a flexible work in progress, a process incorporating the idea of a festival, not bound to a physical location, but travelling from one venue, country and continent to another presenting a hybrid type of mono-channel videos, which can be presented in the same way via screening, projection and installation.

A dual system is forming the supporting frame-work

- virtual (online) components (see links) – all videos, info & event updates online – juxtaposed with the physical component in form of networked screenings & exhibitions
- Agricola de Cologne's curatorial opinion juxtaposed with the curatorial opinions of 40 curators (40 countries) demonstrating the multi-facetted diversity of artistic and curatorial approaches
- the active presenter juxtaposed with the passively consuming audience to be activated via interventions like lectures, panel discussions, artists talks, round table or workshops, not to forget the different types presentation forms, in total, an interactive context intending to link the audience, artists, curators and institutions by thinking and acting in new terms without any restriction.

artvideoKOELN – the curatorial initiative “art & moving images” - <http://artvideo.koeln>
Founded in 2010 by Agricola de Cologne as tool for developing the field of “art & moving images”, artvideoKOELN is representing the operating system behind Cologne International Videoart Festival and the associated platforms.
The status as an initiative without any institutional affiliation and structure Give its founder all curatorial and artistic freedom to explore video as a multi-facetted medium of contemporary art.
