AGRICOLA FOUNDATION for the arts

is the ultimate project of a non-profit art foundation which, aimed far into the future, has the task of collecting the artistic-curatorial work of the media artist/curator Wilfried Agricola de Cologne (Founder), based on his visionary ideas, on the one hand, to preserve for posterity under his leadership during his lifetime and to continue to make them accessible to the public, and after his death, make the continuation/ further development of curatorial projects in particular and the new development of projects in the spirit of the founder possible.

The Anthropocene Project

Curated by Wilfried Agricola de Cologne, The New Museum of Networked Art realizing the Anthropocene Project as a new media art context in an exchange between virtual and physical space, physical and virtual exhibitions and screenings, is inviting artists using moving images/digital video as medium of art to submit videos dealing with the (positive and negative) human impact- regarded as having begun sometime between twelve thousand years ago, with the spread of agriculture, and two hundred years ago, with the advent of industrialization.

TRYST – World's Largest International Art Fair for Artist-run Initiatives –27-29 October 2023 – Los Angeles/LA

The New Museum of Networked Art @ TRYST Los Angeles

The New Museum for Networked Art -founded on January 1, 2000 as NewMediaArtProjectNetwork://cologne, an international, English-language (non-profit) initiative for art and new media based in Cologne/Germany -is led and curated by the media artist and curator Agricola de Cologne.

In 2010 initiative became The New Museum of Networked Art with its own digital collections. The collection of art videos from 2000 to 2023 includes around 10,000 digital works of art from 3,000 international artists.

Initially focused on interactive images before 2005 and primarily on moving images since 2005, the award-winning network structure realizes its projects in collaboration with internationally networked partners presented at biennials, museums and festivals.

In 2020, the Museum of Networked Art launched the "Alphabet Art Center" in an exchange between virtual and physical space.

The presentation of The New Museum of Networked Art at TRYST -27-29 October 2023 in Torrance / Los Angeles CA -does not present any screening programs, but rather the museum as a cross-platform, internationally active initiative with the selection of 6 of its projects realized since 2005, which represent all the other projects that have been realized to date.

The selected 100 artists and 5 curators represent all 3,000 artists and 100 curators who have been involved since its founding in 2000 with their works and programs.

The presentation would like to give an impression of the current focus on art with moving images and the global networking activities with the diversity of artistic and curatorial concepts that the museum stands for, using not complete videos, but rather representative excerpts of different lengths in order to underline the concepts of the presented projects.

1924 2024 Vacations in the Subconscious
100 Years Surrealist Manifesto by André Breton

1924-2024
Vacations in the Subconscious
100 years – The Manifesto of Surrealism by André Breton.

The exhibition focus at The New Museum for Networked Art during 2023 is dedicated to the 100th return of the launch of André Breton's Manifesto of Surrealism, an art and literary movement initiated in 1924 taking fundamental influence on contemporary art and the perception of art, culture and daily life, in general.

The title of the exhibition project "Vacations in the Subconscious" is referring to the influence of Sigmund Freud's psychoanalysis in the arts and philosophy of the 20th century explaining people's behaviors/acting directed from the Subconscious.

Surrealism was one of several art expressions developing simultaneously in the beginning of 20th century at a historical turning point – facing the industrialization, the horrors of World War I and the desire of people one hundred years ago for a kind of counter movement which was not dominated/ directed by mind. 100 years later these days, there is a similar turning point – think of the global climate change, the digitalization, the uprising wars in many parts of the world.

The exhibition curated by New Museum of Networked Art director, Wilfried Agricola de Cologne would like to explore how contemporary artists of the 21st century working with a medium of digital video which did not exist yet during the classical Surrealist era (ending in the sixties of past century) including about 180 international artists and its base The Gall of Fame exhibition – The Tree Surrealists , featuring the video work by three Spanish video artists – Albert Merino, Laura / Sira Cabrera and Ausin Sainz,

Peace Letters to UKRAINE 7

Washington DC - Los Angeles – Rockville – Thessaloniki – Izmir – Quito – Berlin – Bremen - Cologne - Madrid

Starting on 1 March 2022, The New Museum of Networked Art – is realizing during The Russian War against Ukraine (open end) in an exchange between virtual and physical space the audio-visual art project – Peace Letters to Ukraine – as an internationally networked action between participating artists, curators and cultural institutions in solidarity with Ukraine. Initiated by the Cologne based media artist and curator Agricola de Cologne – The Peace Letters Project – would not only like to honor 15 years of collaboration with Ukrainian artists, curators and cultural institutions, but contribute to Peace defending the endangered freedom – freedom of the word, expression and movement as the fundament of free art and culture.

Hall of Fame

As a Department of The New Museum of Networked Art, the "Hall of Fame" is at the same time a program featuring, appreciating and honoring artists working with audio-visual media for their achievements as artists – in most different concern. It is the goal to present and support the diversity of talents and the variety of concepts, use of media and individual artistic workout. To be considered for the curated shows are single artists, as well groups of artists according to specific curatorial concepts by Wilfried Agricola de Cologne.

The 7 Memorials for Humanity

-developed, created and curated by Wilfried Agricola de Cologne & released in 2019, the 7 Memorials project is a multi-facetted digital media art context – a "platform for commemorating" – to be understood as a kind of multi-dimensional virtual sculpture – working in an exchange between virtual and physical space. While the memorial sites are located online for permanent – accessible 24 hours a day, 7 days a week and 365 days of a year, there will be temporary locations in physical space hosting a manifestation to be complemented by interventions like screenings, a symposium, lectures, discussions, artists meetings, exhibitions, performances etc in order to reach a higher degree of sustainability by sensitizing people via art.

Commemorating as an advanced and, additionally, collective form of perception as the contrary of consuming in which the aspect of time is receiving generally a particular relevance – stimulating the "audience" permanently or at least regularly to be activated again and again and reflect and re-reflect – and, in the given case, also as a higher goal of art which goes far beyond the visual or sensual sensation.

Based on 7 differently aimed ongoing audio-visual media art contexts, the project is dealing with new forms of commemorating to the future, respectively generating awareness, related to topics that really matter in the currently globally and locally escalating political, social, ecological and cultural situations endangering a free, open and democratic society and Humanity as that fundamental human value, at all. It is a plea to the contemporarily living people to keep and defend humanity as the highest human value also for future generations.

As a media art work itself, the 7 Memorials commemorative platform is incorporating 20 projects launched between 2001 and 2020 - acting individually as Memorials, project contexts - each one representing works of media art for itself, simultaneously they are based on the engagement of (external) artists by contributing (mainly audio-visual) art works which form in the sum of all (2000 by 1700 artists), related to each topic differently, individual art collections in a community based responsibility, curated and coordinated by Wilfried Agricola de Cologne.

artvideoKOELN – audiovisual experiences 01

that's the name of a series of events around the topic of „audiovisual art", developed by the Cologne based media artist and curator, Wilfried Agricola de Cologne. The 1st edition will be realised in collaboration with TENRI – Japanese/German Cultural Centre located at the old Southern part of the city of Cologne.

Launched in 2005 by Agricola de Cologne, as a curatorial initiative artvideoKOELN was during the past 10 years the driving power behind *CologneOFF* – Cologne International Videoart Festival – an unique festival project of its kind exporting media art from Cologne in collaboration with networking partners all over the world.

The event on 16 May 2015 will present on the different spatial levels at TENRI a selection of art videos and film by more than 410 international artists from 61 countries following an open call for submitting audiovisual works.

Selected by the jury consisting of Kai-Welf Hoyme (Cologne) - Yoshiro Shimizu (Cologne) - Wilfried Agricola de Cologne (Cologne), the videos will be presented in different formats – screening, projection and installation, including also programs of CologneOFF's international partners Now & After International Videoart Festival Moscow (Russia), VideoBabel – International Festival of Audiovisual Art Cusco (Peru) & Athens Digital Arts Festival (Greece), as well as as an introduction by Wilfried Agricola de Cologne and an artists talk including invited Cologne based video creators, moderated by Wilfried Agricola de Cologne.

CologneOFF XP nomadic - videoart in a global context –
Searching for an ideal form of presenting "art & moving images"

As a dynamic media art event context and nomadic festival project designed, programmed, curated and directed by Agricola de Cologne in the framework of Cologne International Videoart Festival, "CologneOFF 20XX – videoart in a global context" started in 2010, when he took the perception how the jury for his 6th festival edition (directors of 7 renown international festivals) was voting - just one video collected 4 votes showing the curators following strictly their individual curatorial point of view - as the basis for researching an (his) ideal form of (re)presenting videoart.
The result is a flexible work in progress, a process incorporating the idea of a festival, not bound to a physical location, but travelling from one venue, country and continent to another presenting a hybrid type of mono-channel videos, which can be presented in the same way via screening, projection and installation.

A dual system is forming the supporting frame-work
 - virtual (online) components (see links) – all videos, info & event updates online – juxtaposed with the physical component in form of networked screenings & exhibitions
 - Agricola de Cologne's curatorial opinion juxtaposed with the curatorial opinions of 40 curators (40 countries) demonstrating the multi-facetted diversity of artistic and curatorial approaches
- the active presenter juxtaposed with the passively consuming audience to be activated via interventions like lectures, panel discussions, artists talks, round table or workshops, not to forget the different types presentation forms, in total, an interactive context intending to link the audience, artists, curators and institutions by thinking and acting in new terms without any restriction.

https://cologneoff.nmartproject.net

is representing the umbrella for a wide range of activities around "art & moving images" including the festival platform for

Cologne International Videoart Festival
animateCOLOGNE – Cologne Art & Animation Festival
1#minuteCOLOGNE – Cologne One Minute Film Festival
exDox – experimental documentary film festival
d/i/light – Darkness Into Light Festival
The W:OW Art Film & Video Festival
artvideoKOELN – audiovisual experiences

artvideoKOELN – the curatorial initiative "art & moving images" - https://artvideo.koeln
Founded in 2010 by Agricola de Cologne as tool for developing the field of "art & moving images", artvideoKOELN is representing the operating system behind Cologne International Videoart Festival and the associated platforms.
The status as an initiative without any institutional affiliation and structure Give its founder all curatorial and artistic freedom to explore video as a multi-facetted medium of contemporary art.

[R] [R] [F]
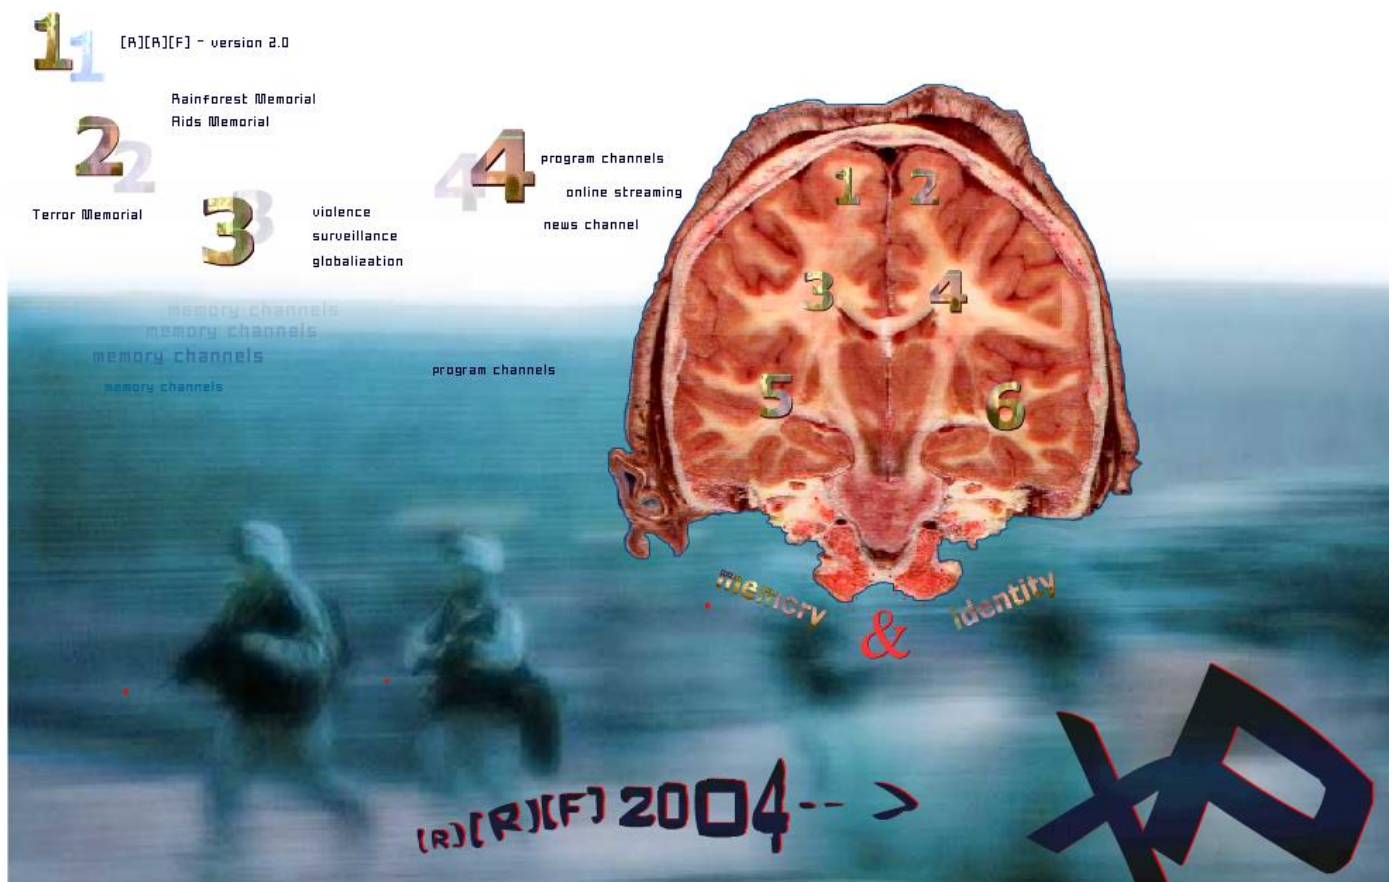

The global networking project [R][R][F] 200x —>XP is an experimental New Media art context created and developed by media artist and New Media curator Agricola de Cologne between 2003-2007 which he was developing and organising completely online.

[R][R][F] 200x–>XP includes a variety of online and offline components
The basic subject –>"Memory and Identity"
The basic operating aspect –>"networking as artworking".
The basic presentation aspect –>physical installation – the exchange/combination of virtual and physical space.

Due to its complexity, [R][R][F] 200x —>XP is constructed of two parts, a low-tech administrative body which contains all relevant project related information in a textual form, and an high tech artistic body based on an interface developed in Flash. Both together form the artwork to be transported or distributed via the Internet. The artistic body includes all art related components which may come from most different sources.
The interface of the artistic body refers to the human brain and its complex networking structures by visualizing them in different ways. The essential nodes of connection are reduced to some basic sections, named: "Memory Channels". Each of these "Memory Channels" (currently eight) is focussing on different aspects of "memory and identity" – and may carry some sub-sections as well, modules which contain specific project environments or individual art works.
