CologneOFF - a challenge in video

Lecture by Agricola de Cologne

The lecture goes down to the question who is actually designing culture, and what are the tools for designing culture. Agricola de Cologne is using his festival project "CologneOFF 2011-2012 - videoart in a global context" - as a tool for designing his idea of an "ideal" culture, which is based on diversity, networking and cooperating, and video as the global medium of the field of his activity, "art and moving images".
