Statement

WOW.18 / USA is the 18th and so far most comprehensive manifestation of „The W:OW Project – We Are One World“ and the 1st one in USA @ Torrance Art Museum. Running between 21 July and 14 December 2018 @ TAM, the screening program series of „The W:OW Art Film & Video Festival“ are presenting the entire artvideo program as it was presented at 10 venues in 2017 including more than 125 art films & videos by 125 artists from about 30 countries selected by 10 guest curators from Mexico, Greece, Spain, Portugal, Bulgaria, Italy, Israel, Austria & Russia and the German Wilfried Agricola de Cologne as a chief curator and director of „The W:OW Project“ – packed into 20 curated, conceptual programs.

According to its concept and reflecting the diversity of life, in general, and human existence, in particular, „The W:OW Project“ program would like to present a diversity of artistic and curatorial concepts, as well as a variety of topics affecting human individuals wherever they live on the globe. The project is using the technology of video and the medium of „moving images“ as a contemporary audio-visual language of art, addressed to an open minded audience who is eager to learn new ways of viewing following the new rules of „artvideo“, differently than the mass of static and moving images overwhelming people in daily life permanently like in cinema, television or Internet – giving the individual image or „frame“ back its individuality, and time another relevance and perception.

Currently he is founder and director of CÓDEC Festival de Video y Creaciones Sonoras. He occasionally writes about cinema and collaborate at movie festivals in Mexico

Roland Wegerer (Austria)

creates media artworks, photos, sculptures and performances. By questioning the concept of movement, Wegerer tries to grasp language. Transformed into art, language becomes an ornament. At that moment, lots of ambiguities and indistinctness's, which are inherent to the phenomenon, come to the surface.

His media artworks focus on the inability of communication which is used to visualize reality. The attempt of dialogue, the dissonance between form and content and the dysfunctions of language will be concentrated.

In short, the lacks of clear references are key elements in the work. By investigating language on a meta-level, he plays with the idea of the mortality of an artwork confronted with the power of a transitory appearance, which is, by being restricted in time, much more intense. Roland is also founder and director of the danubeVIDEOARTfestival and VOS|Roland Wegerer.

Gioula Papadopoulou (Greece)

Her artistic practice focuses on video art. As an artist, she has presented her work in several group exhibitions, site-specific projects and video art festivals in Greece and abroad.

Also, she is a founding member, co-director & curator of Video Art Miden (Miden means “zero” in Greek), an independent organization for the exploration and promotion of video art, founded in 2005. Video Art Miden started as an international video art festival in Kalamata, Greece, and gradually became a platform for international videoart, creating a broad network of collaborations and exchanges with major international festivals and organizations all over the world

Antonio Alvarado (Spain)

Digital, cybernetic and multimedia artist & curator. He has been working for 40 years, having performed multiple solo and group exhibitions. More than 20 years ago he began to work with computers, since then he mixes in his works the electronic, the digital and the plastic.

His ideas, close to Theory of Strings and other contemporary theories, are not used as absolute truth but as an excuse to uncover worlds that hide under the layers of what is called reality, expanding it. Having knowledge of software and hardware, he is in favor of working in collaboration with other people, and currently developing works, which combine plastic and electronics, with the Weber-Lutgen Gallery in Seville, the Museo La Neomudejar in Madrid and some members of Makespace Madrid.

Georgi Krastev

was born in 1986 in Varna, Bulgaria. He studied Psychology at the Varna Free University. In 2012 graduated at the National Academy for Theatre and Film Arts in Sofia, Bulgaria. As an artist, he has presented his works in several exhibitions and festivals in Bulgaria and abroad. Also, he is a co-founder, director of The Quarantine Film Festival. The name of the region “The Quarantine” comes from the past when the sailors from commercial ships entering the harbor with suspicion of some kind of disease were taken ashore at the beach for the quarantine period of 40 days. In case they showed no signs of illness, they were allowed access to town.

Paulo B. Menezes (Portugal)

Born in Portugal in 1976, he became interested in arts in childhood, particularly in cinema, which would lead him to cinema, literature, music and to, later on, continued practices in several areas. Later, he published experimental music through the Plancton Music label, studied filmmaking, created video art and experimental cinema and, more recently, curated video art and experimental cinema programs through Oblíqua / Videoarte & Cinema Experimental.

As a part of THE W:OW PROJECT and dedicated to the audio-visual medium, THE W:OW ART FILM AND VIDEO FESTIVAL is dealing thematically with the Present and Future of planet Earth under the influence of the human species. WE ARE ONE WORLD is not just another artistic topic, it is the complex reality and at the same time an Utopia that matters.

The „world“ is not just planet Earth as an all encompassing whole, but also the „world“ in terms of the environment or place the individual is living in: family, circle of friends, society, city, region, country or continent, or other sortlike unities marking the individual and collective identity, their relation between each other, and the responsibility of the individual for each other and the Whole.

THE W:OW PROJECT, respectively THE W:OW ART FILM & VIDEO FESTIVAL initiated by artvideoKOELN & The New Museum, of Networked Art – directed by Wilfried Agricola de Cologne - is representing such a sample world on a small scale, in which artists, curators and worldwide networking partners and, not to forget, the audience are acting in mutual respect, demonstrating the diversity of artistic and curatorial concepts. The festival project is consisting of three (3) basic program components, the general festival selection, the contributions by invited curators from all over the world and curated selections from associated art film collections like artvideoKOELN Collections, The Refugee Film Collection or Collective Trauma Film Collections, they form the fundament for a wide range of presentation formats like screening, projection and installation (exhibition).

According to its concept, the W:OW Project - incorporating different levels on a local and global scale – will manifest at many venues all over the world.
